**Michel Fontaine, President and CEO of Windfall Geotek commented:** *“This announcement reflects the expansion our company is taking globally and will help attract new investors and raise awareness to our CARDS AI technology among US base exploration companies. The current gold bullish market condition is a sign for the need to increase our company exposure and confirm that Windfall Geotek is a global leader software choice for the use of artificial intelligence in digital mineral exploration. Our CARDS AI machine learning can provide exploration teams a faster, cheaper and greener process to find mineralization and we hope our story will resonate with US investors”.*

**Dinesh Kandanchatha Chairman added:** *“We had been considering this listing for a while and we are proud to finally offer our friends in the USA the possibility to get on board with our leading AI technology in this unique time. We are confident the additional shareholders pool that OTCQB provide will be a great asset in our growth and support the various projects we have in the books”.*

### About Windfall Geotek – Powered by Artificial Intelligence (AI) since 2005

Windfall is an Artificial Intelligence company that has been in business for over 15 years developing its proprietary CARDS analysis (AI) and data mining techniques (EagleEye™) with over 90 successful projects completed. Windfall Geotek can count on a multidisciplinary team that includes professionals in geophysics, geology, Artificial Intelligence, and mathematics. It combines available public and private datasets including geophysical, drill hole and surface data. The algorithms designed and employed by Windfall are calculated to highlight areas of interest that have the potential to be geologically similar to other mineral deposits and mineralization. The Company's objective is to develop a new royalty stream by significantly enhancing and participating in the exploration success rate of mining and to continue the Land Mine detection application as a high priority. Windfall has played a part in numerous past discoveries utilizing its methodology as described at: <https://windfallgeotek.com/>.
